

# **SNS COLLEGE OF TECHNOLOGY**

**Coimbatore-35**  
**An Autonomous Institution**

Accredited by NBA – AICTE and Accredited by NAAC – UGC with ‘A+’  
Grade Approved by AICTE, New Delhi & Affiliated to Anna University,  
Chennai

## **DEPARTMENT OF AEROSPACE ENGINEERING**

### **19ASZ301– ROBOTICS & AUTOMATION IN SPACE**

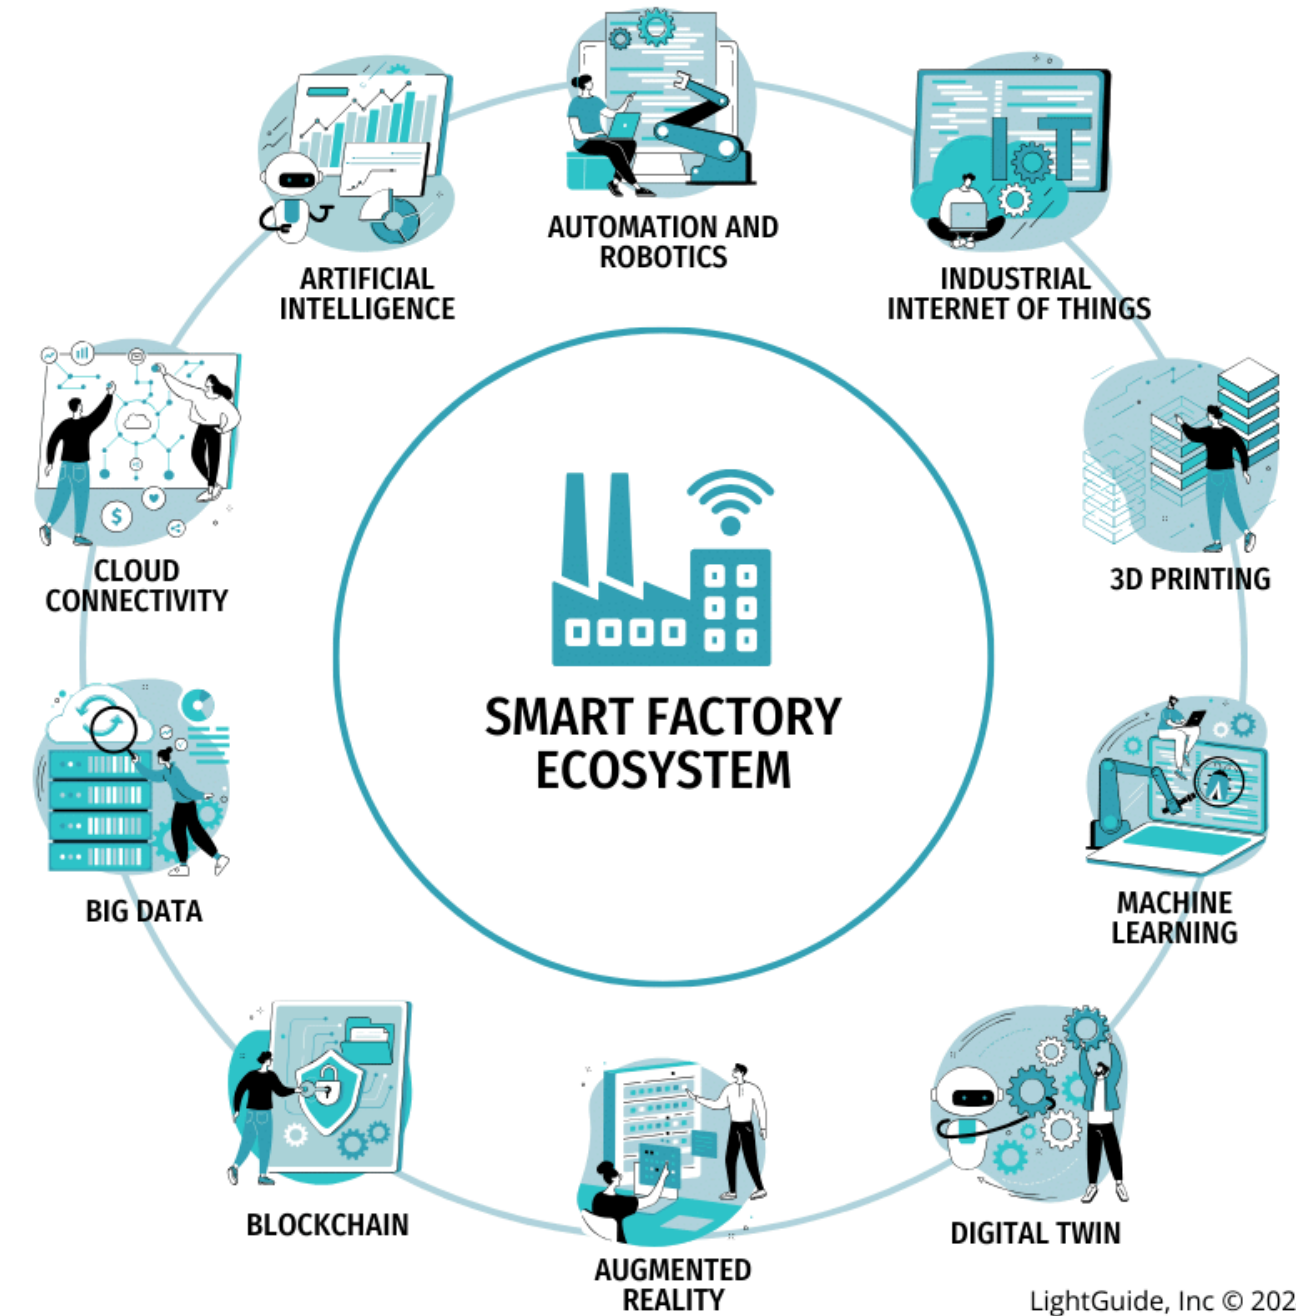

**III YEAR VI SEM**

#### **UNIT 1 –INTRODUCTION TO AUTOMATION**

#### **TOPIC - FACTORY & MANUFACTURING AUTOMATION**

# FACTORY AUTOMATION

# SMART FACTORY

# FACTORY VS MANUFACTURING

## 1. Factory Automation

### ✔ Definition:

Factory automation refers to the automation of entire factory systems, including production lines, material handling, inventory, environmental controls, and energy management.

### 🧠 Focus Areas:

- Centralized monitoring & control (SCADA, DCS)
- Automated logistics (AGVs, conveyor systems)
- Building automation (HVAC, lighting, safety)
- Integration with ERP/MES systems
- Plant-wide energy and maintenance management

Aspect	Factory Automation	Manufacturing Automation
Scope	Whole factory systems	Production/assembly processes
Focus	Logistics, building systems, integration	Machinery, production steps
Technologies	SCADA, AGVs, IoT, MES	CNC, PLC, robotics, sensors
Goal	Optimize plant-wide operations	Automate and improve product manufacturing
Example System	Smart inventory system	Robotic welding line
