

Formation of Fossil Fuels

Across

- 4. A natural, non-renewable fuel such as coal, oil, and natural gas formed over millions of years from the remains of dead organisms
- 6. Layers of rock formed when sediment is deposited and then compacted, and cemented over time
- 7. Along with time, Fossil Fuels need _____ and pressure.

- 8. Flammable liquid produced from the remains of marine organisms
- 10. The waste and remains of plants and animals
- 12. A flammable material without definite form, produced from the remains of marine organisms

Down

- 1. The final stage in the formation of Sedimentary Rock
- 2. Amount of years it takes Fossil Fuels to form

- 3. Fossil Fuels are considered to be _____ resources because it takes too long for them to form.
- 5. The process that breaks down rock into smaller sediments
- 9. Force of objects pushing on other objects
- 11. A solid fossil fuel that is formed from the concentrated remains of plants over a very long period of time
