

RECAP.....

```
select title_year, content_rating, avg(gross)
from t1
where title_year >= 2000
group by title_year, content_rating
```

Connecting two tables.....

➤ https://docs.google.com/spreadsheets/d/1aeZllwICUG7Q_rEgtNm4zj9pVV4iJaND6uUbou0qOp8/pub?gid=873193374&single=true&output=csv

Query 1: All movies with nominations

```
select title_year, movie_title, category
from t1, t2
where t1.movie_title = t2.Nominee
order by title_year desc
```

Combining two tables with Constraints....

Query 2: Year corrected, winners only

```
select title_year, movie_title, category, `Won?`  
from t1, t2  
where t1.movie_title = t2.Nominee  
and t1.title_year = t2.Year  
and `Won?` = "YES"  
order by title_year desc
```

THANKS!

Any questions?
