

## UNIT 4- ALGEBRAIC STRUCTURE

## Cayley Hamilton Theorem

Step 3:

To prove  $G_1$  and  $G_1'$  are isomorphic.

Define  $\phi: G_1 \rightarrow G_1'$  by  $\phi(a) = f_a$

Let  $\phi(a) = \phi(b) \Rightarrow f_a = f_b$

$$\Rightarrow f_a(x) = f_b(x)$$

$$\Rightarrow ax = bx$$

$$\Rightarrow a = b$$

Hence  $\phi$  is 1-1.

Since  $f_a$  is onto,  $\phi$  is onto.

Also  $\phi(ab) = f_{ab} = f_a \circ f_b = \phi(a) \circ \phi(b)$

$\therefore \phi: G_1 \rightarrow G_1'$  is an isomorphism.

$\therefore G_1 \cong G_1'$

Hence the proof.
