	3559	3350	3555	12406	.46
	3895	3200	3559	.367	441

Exploring Outlet Details

Outlet Key	Name	Country	Genotype
209	Baildon store	United Kingdom	Physical store

Understanding Product Information

Product Key

Unique identifier for each product

Classification

Main category and subcategory

Example

Product 956: Digital camera

Business Intelligence Concepts

1 Data Aggregation

Combine data across different dimensions

2 Trend Analysis

Uncover patterns in business performance

3 Strategic Insights

Guide decision-making based on data trends

Aggregating Measures Across Dimensions

Channels

Compare sales across different distribution methods

Countries

Analyze performance in various geographical regions

Time Periods

Examine trends over months, quarters, or years

Leveraging Insights for Business Growth

Identify Trends

Spot patterns in aggregated data

Develop Strategies

Create action plans based on insights

Drive Growth

Implement data-driven decisions for business expansion
