

VQAR-II MACHINE INPUT OUTPUT

Directions(1-5): A word and number arrangement machine when given an input line of words and numbers rearranges them following a particular rule in each step. The following is an illustration of input and rearrangement.

Input: variety 35 spices 21 for 79 good 54 taste 46
Step I: for variety 35 spices 21 79 good 54 taste 46
Step II: good for variety 35 spices 79 54 taste 46 21
Step III: taste good for variety 35 spices 54 46 21 79
Step IV: spices taste good for variety 54 46 21 79 35
Step V: variety spices taste good for 46 21 79 35 54
Step V is the last step.

Find the various steps and final output for the input given below.

Input: Strong 64 relations 25 depends 38 on 53 base 45

1. Which of the following represents the fifth element from left end in step IV and fourth element from right end in step II respectively?
A. relation -38 B. 25 - 53 C. relation - base D. relation - 53
E. None of these
2. What is the difference of the odd numbers that come between 'strong' and 'base' in step I?
A. Only one odd number comes in between B. 14 C. 28
D. No odd number comes in between E. Can't be determined
3. With respect to the step V, Four of the following five are alike in a certain way and the form a group. Which of the following does not belong to that group?
A. 38 B. base C. depends D. 53 E. 45
4. Which of the following elements is third to the left of fourth element from right end in step III?
A. 53 B. relation C. base D. depends E. None of these
5. What is the sum of the numbers that are towards the right of 'base' in step I?
A. 109 B. 102 C. 91 D. There is only one number
E. None of these

Directions(6-10): Read the given information carefully and answer the questions given beside:

The first step is the resultant of the product and sum of the digits in input as per the lines indicated. Further steps are obtained by applying certain logic. Numbers of step II have been obtained by using at least 1 digit of each number in step 1. Each step is a resultant of previous step.

6. Which one of the following is half of the value obtained in final step?
A. 151250 B. 142870 C. 160080 D. 202500 E. None of these
7. Which one of the following is a number obtained in step II?
A. 1550 B. 1650 C. 1200 D. 1100 E. None of these
8. Find the difference of the numbers obtained in step II?
A. 660 B. 550 C. 630 D. 420 E. None of these
9. Which one of the following is one of the numbers obtained in step I ?
A. 32 B. 44 C. 56 D. 50 E. None of these
10. Which one of the following is the required final step?
A. Step V B. Step VI C. Step IV D. Step VII E. None of these

Directions(11-14): Study the following information carefully and answer the questions given beside.

Input: 781 vsskt 651 ltsk 486 deef 351 jklm 581 tuvw

Step 1: 351 781 vsskt 651 ltsk 486 jklm 581 tuvw deef

Step 2: 651 351 781 vsskt ltsk 486 581 tuvw deef jklm

Step 3: 581 651 351 781 vsskt 486 tuvw deef jklm ltsk

Step 4: 781 581 651 351 vsskt 486 deef jklm ltsk tuvw

Step 5: 486 781 581 651 351 deef jklm ltsk tuvw vsskt

Step 5 is the final step

As per the pattern followed in the above steps, find out for given input:

Input: 555 cat 651 dog 481 gold 231 modi 631 ruchi

11. In which step we will get the following output?
651 631 555 231 481 modi ruchi cat dog gold.
A. Step 5 B. Step 4 C. Step 3 D. There is no such step
E. None of these
12. If in step 4 '651' is related to '231' & '555' is related to 'cat', then following the same pattern '631' is related to _____
A. ruhe B. 231 C. 555 D. cat E. gold
13. Which of the following statements is correct regarding position of 'ruchi' in the 4th step?
A. Third to left 651 B. Second to right of gold C. Second to right of 631
D. Second to right of 231 E. Second to left of gold
14. In step 5 which of following word or number is 3rd to the right of the word/number which is 2nd to the right of '651'?
A. modi B. gold C. cat D. 555 E. 231

Following the same pattern solve the given input.

Input: fear creates demons only hope defeat

15. What will be the value obtained in final step of the arrangement?

- A. 36 B. 26 C. 81 D. 49 E. 72

16. What is the product of the numbers obtained in step IV?

- A. 36 B. 16 C. 24 D. 18 E. 12

17. Which of the following numbers will represent 'Fear' in step II?

- A. 36 B. 38 C. 25 D. 20 E. 18

18. Which of the following words will be obtained in step I?

- A. Aeit B. aeefhix C. ehmmow D. bmop E. aeegu

19. What is the sum of the numbers obtained in step III?

Change in word: The words are rearranged as per ascending order of number of letters and placed at extreme left end. Change in number: The numbers are rearranged as per ascending order of sum of their digits until a single digit is obtained and shifted to extreme right end.

Note- Change in word and number takes place simultaneously at each step. Only one word and one number is changed in a step.

Common Explanation for (6-10):

Answer:

6. 151250 is half of the value obtained in final step.

Option A, is hence the correct answer.

7. 1550 is one of the numbers obtained in step II.

Option A, is hence the correct answer.

8. As, $1550 - 1000 = 550$.

So, the Difference between the numbers obtained in step II is 550.

Option B, is hence the correct answer.

9. 50 is one of the numbers obtained in step I.

Option D, is hence the correct answer.

10. Step IV is the required final step.

Option C, is hence the correct answer.

Common explanation for (11-14):

References:

555 cat 651 dog 481 gold 231 modi 631 ruchi

Inferences:

Both word & number are rearranged simultaneously.

Number logic: the sum of digits of number is taken. Number whose sum of digits is lowest is taken and placed at first.

The words are arranged in descending order from right to left from the right end. In the first step, the words are arranged as ascending order according to the first letter of the word and so on.

Input: 555 cat 651 dog 481 gold 231 modi 631 ruchi

Step 1: 231 555 651 dog 481 gold modi 631 ruchi cat

Step 2: 631 231 555 651 481 gold modi ruchi cat dog

Step 5: 555 481 651 631 231 cat dog gold modi ruchi

Step 5 is the final step

Answer:

11. There is no such step.

Hence, option D is correct.

12. Step 4: 481 651 631 231 555 ruchi cat dog gold modi

Hence, option C is correct.

13. Step 4: 481 651 631 231 555 ruchi cat dog gold modi

Hence, option D is correct.

14. Step 5: 555 481 651 631 231 cat dog gold modi ruchi

Hence, option B is correct.

Common Explanation for (15-19):

Reference:

Input: always begin from bottom mount high

Step I: aabdho eimty inou ggnouy gmnou isst

Inference:

In the Step I, firstly the consonants within each word in Input step are reversed in cyclic alphabetical order after that the words thus formed are arranged according to dictionary from left to right.

For example:

The word 'Fear' after reversing the consonants in cyclic alphabetical order and arranging the letters in alphabetical order becomes 'aeiu'.

Using the same rule Step I of the given Input can be written as:

Input: fear creates demons only hope defeat

Step I: aeiu aeeghix ehmnw bmo eoks aeegu

Reference:

Step II: 3 44 31 23 2 49

Inference:

In the Step II, the difference of numbers obtained from the sum of the numeric position in alphabetic

series of each vowel and the sum of the numeric position in alphabetic series of each vowel of the same

word in Step I is taken.

For example:

The vowels in the word 'aeiu' are 'a', 'e', 'i' and 'u' and numeric position of 'a', 'e', 'i' and 'u' in alphabetic is '1', '5', '9' and '21' respectively so the sum of the numeric positions of vowels is $1 + 5 + 9 + 21 = 36$. As, there are no consonants in the word 'aeiu' so we will consider 36 as the final number. And, the vowels in the word 'aeeghix' are 'a', 'e', 'e' and 'i' and numeric position of 'a', 'e', 'e' and 'i' in alphabetic is '1', '5', '5' and '9' respectively, so the sum of the numeric positions of vowels is $1 + 5 + 5 + 9 = 20$ and the consonants in the word 'aeeghix' are 'g', 'h' and 'x' and numeric position of 'g', 'h' and 'x' in alphabetic is '7', '8', and '24' respectively, so the sum of the numeric position of consonants is $7 + 8 + 24 = 39$. And, the difference of 39 and 20 is 19 so the number is 19.

Using the same rule Step II of the given Input can be written as:

Step II: 36 19 38 15 10 2

Reference:

Step III: 48 18 72

Inference:

In the Step III, the digits of first and second number are multiplied within the number and the numbers

thus obtained are multiplied form a single number the same pattern is followed with third and fourth

number, and fifth and sixth number.

For example:

First and second numbers from left end is Step II are '36' and '19' respectively and after multiplying the digits of '36' and '19' with the numbers we get '18' and '9', and after multiplying '18' and '9' we get 162. So the number is 162.

Using the same rule Step III of the given Input can be written as:

Step III: 162 120 0

Reference:

Step IV: 3 9

Inference:

The first and second numbers from left end in Step III are subtracted then the digits of the number thus formed are added within the number to form the first number from left end in step IV. and the same pattern is repeated with second and third number from left end in step III to form the second number from left end in step IV.

For example:

First and second numbers from left end in Step III are '162' and '120' respectively. The difference of '162' and '120' is 42 and the sum of the digits of '42' is '4 + 2 = 6'. So the number is 6.

Using the same rule Step IV of the given Input can be written as:

Step IV: 6 3

Reference:

Step V: 144

Step V is the last step of the arrangement.

Inference:

In the Step V, the sum of the numbers in step IV is taken and the number thus formed is squared.

For example:

After adding the numbers $6 + 3 = 9$ and the square of 9 is 81. So the number is 81.

Using the same rule Step V of the given Input can be written as:

Step V: 81

As it is given that Step V is the last step of the arrangement so the given input is completed.

Final Solution:

Input: fear creates demons only hope defeat

Step I: aeiu aeeghix ehmnw bmo eoks aeegu

Step II: 36 19 38 15 10 2

Step III: 162 120 0

Step IV: 6 3

Step V: 81

Step V is the last step of the arrangement.

Answer:

15. Following the final solution we can say that 81 will be obtained in final step of the arrangement.

Hence, the correct answer is option C.

16. Following the final solution we can say that the numbers obtained in step IV are '6' and '3'.

Required Value = $6 \times 3 = 18$

Hence, the correct answer is option D.

17. Following the final solution we can say that 36 will represent 'Fear' in step II.
Hence, the correct answer is option A.

18. Following the final solution we can say that 'aeeuw' will be obtained in step I of the given arrangement.
Hence, the correct answer is option E.

19. Following the final solution we can say that the numbers obtained in step III are '162', '120' and '0'.

Required Value = $162 + 120 + 0 = 282$

Hence, the correct answer is option B.

Hence, the correct answer is option E.

23. Following the final solution we can say that there are five elements between '74' and 'leaved' in Step IV.

Hence, the correct answer is option D.

24. Following the final solution we can say that position of 'Object' will be third from right end in step V.

Hence, the correct answer is option A.

Common Explanation for (25-29):

Change in Number: Change in numbers take place as per the ascending order of the sum of the digits of each number. The number whose sum of digits is smallest is placed at extreme left end followed by the number whose sum of digits is second smallest and so on. **Change in Word:** Change in words take place in descending order of number of consonants in each word. The word with the highest number of consonants is placed at left end (immediately after the number) followed by the word with the second highest number of consonants and so on.

Note: Changes in word and number take place in alternate steps starting with number first. If in a step, a number is already at the desired place then for that particular step operation will be performed on word and vice-versa.

Answer:

25. From the following output it is clear that 9 steps are needed to reach the final output.

Hence option B is correct.

26. From the following output it is clear that 'transfer' is fourth to the left of 47 in step VI.

Step VI: 32 technology 51 transfer 26 achieving 72 47 rate extra 91 version

Hence option C is correct.

27. From the following output it is clear that "version 91 47 rate" is seen in the same sequence in step VIII.

Step VIII: 32 technology 51 transfer 26 achieving 72 version 91 47 rate extra

Hence option B is correct.

28. From the following output it is clear that 'rate' is exactly between 51 and 91 in step III.

Step III: 32 technology 51 transfer 47 26 rate 72 achieving extra 91 version

Hence option A is correct.

29. From the following output it is clear that 'achieving' is seventh from right end in final output.

Step IX: 32 technology 51 transfer 26 achieving 72 version 91 extra 47 rate

Hence option B is correct.

Common Explanation for (30-34):

Change in Word: Change in words takes place as per the dictionary order and placed at the right end just before the number.

Change in Number: Change in numbers takes place as per the ascending order.

Thereafter numbers are changed to a new number which is obtained by application of the following rules and then shifted to the extreme right end.

Rule I: If the number is even, then place '2' at the end of the number.

Rule II: If the number is odd, then place '3' at the beginning of the number.

Note: Changes in word and number take place simultaneously in each step.

Answer:

30. From the following output it is clear that 'taboo' is third from left in "Input" as well as in "step 4."

Hence option E is correct.

31. From the following output it is clear that "taboo 311 tackle 482 team 355 test 369 tissue 383" is the final output.

Step 5: taboo 311 tackle 482 team 355 test 369 tissue 383

Hence option B is correct.

32. From the following output it is clear that the difference between the highest and the lowest numbers of step 3 is 413.

Step3: 83 tissue 69 test taboo 311 tackle 482 team 355

Hence option D is correct.

33. From the following output it is clear that '69' is second to the left of fourth element from right end in step 2.

Hence option C is correct.

34. From the following output it is clear that '83 tissue taboo' is seen in the same sequence in step 4.

Hence option A is correct.

Common Explanation for (35-39):

Each step is obtained by applying an operation different from the previous step.

Reference:

Input: spread joy laughter by sharing smile with masses

Step1: 9 2 11 5 6 4 7 9

Inference:

Here the operation performed is : Addition.

Here, the conversion of letters to numbers is done by performing addition of certain numbers to the number of letters of each word. The numbers are to be written in the same order in which their respective words are written in the input. If the number of letters are even then add 3 to the number of letters, if the number of letters are odd then less 1 from the number of letters.

Following the same logic, we can easily find the values of step 1.

For 'good' number of letters are 4 so its respective number becomes $4 + 3 = 7$.

For 'being', number of letters are 5 so its respective number becomes $5 - 1 = 4$.

Input: being good to everyone sometimes invite sad trouble

Step1: 9 2 11 5 6 4 7 9

Step2: 99 10 42 36

Inference:

Here the mathematical operation performed is : Multiplication.

To obtain the first value of step 2, product of first and third numbers (from left end) is taken.

To get the second value of step 2, product of second and fourth numbers is taken.

To acquire the third value of step 2, product of fifth and seventh numbers is taken.

To identify the fourth value of step 2, product of sixth and eighth numbers is taken.

Following the same logic, we can easily find the values of step 2.

Step1: 4 7 5 11 8 9 2 6

Step2: 20 77 16 54

Reference:

Step2: 99 10 42 36

Step3: 57 26

Inference:

Here the operation performed is : Subtraction.

First value of step 3 is obtained by taking the difference of first and third numbers from left end.

Second value of step 3 is obtained by taking the difference of second and fourth numbers from left end.

Following the same logic, we can easily find the values of step 3.

Step2: 20 77 16 54

Step3: 4 23

Reference:

Step3: 57 26

Step4: 5

Inference:

Here the operation performed is : Average.

Average of all the digits of step 3 is taken to obtain the value of step 4.

Following the same logic, the value of step 4 is $(4+2+3)/3 = 3$

Step3: 4 23

Step4: 3

Final Output:

Input: being good to everyone sometimes invite sad trouble

Step1: 4 7 5 11 8 9 2 6

Step2: 20 77 16 54

Step3: 4 23

Step4: 3

Answer:

35. From the following explanation it is clear that if 3 is added to one of the digits of step 3, the final output will become 4 i.e. will be increased by 1.

Hence, option E is the correct answer.

36. From the following explanation it is clear that sum of the numbers of step 3 is 27 $(23+4)$, square of which is 729.

Hence, option A is the correct answer.

37. From the following explanation it is clear that if 'sad' is replaced by "so" then second last value(From left end) of step 1 will become 5 and second last value(From left end) of step 2 will become 40 by replacing 16.

Hence, option B is the correct answer.

38. From the following explanation it is clear that '3' is the only number that belongs to one of the steps of the given output, whereas all other numbers are not from the given steps of output.

Hence, option D is the correct answer.

39. From the following explanation it is clear that the sum of even numbers in step 2 is 90 (20+16+54) and sum of odd numbers in step 3 is 23.

Required difference = $90 - 23 \Rightarrow 67$.

Hence, option C is the correct answer.

Common Explanation for (40-44):

Change in Number: Change in numbers take place as per the ascending order of the sum of the digits until a single digit is obtained. The numbers are placed at alternate extreme ends starting from the extreme left end.

Change in Word: Change in words take place as per the ascending order of the number of letters in each word. The words are placed at alternate extreme ends starting from the extreme right end.
