

1. Discuss the scope and limitation in adoption of precision farming in India.
2. Explain in detail about the different Systems of Automation in irrigation.
3. Explain the Various Soil Moisture Measuring Techniques with diagrams.
4. Explain the factors Influencing GPS Accuracy in detail.
5. Discuss the concepts and techniques; their issues and concerns reference for precision farming in Indian agriculture.
6. Compare the traditional farming and the precision farming along with limitations of precision farming.
7. Discuss the need of Precision farming and mention the tools and equipment/techniques used in precision farming.
8. Explain the various Sensing Platforms that are used in Precision farming.
